

# GR30 GRINDERS

# STANLEY®

## FEATURES:

- The integral Stanley Hyrevz™ gear motor is manufactured to exacting standards to deliver maximum efficiency.
- The over-sized motor run-down valve allows the motor to freely run down in speed when the grinder is turned off ensuring that a properly installed wheel will not spin off the spindle.
- The built-in reverse-check valve in the handle prevents operating the grinder when reverse-plumbed to the hydraulic system.
- The Stanley dual-spool selector is accessible under a seal plug at the rear of the tool.
