

INTERMOUNTAIN SALES COMPREHENSIVE SOLUTION

Unlock the power of seamless integration with our all-in-one package featuring E.H. Wachs Water Valve Maintenance, Survey Grade Stonex GNSS Hardware, and infraMAP®'s cutting-edge software. Experience unparalleled precision and efficiency as these three systems work together harmoniously, ensuring optimal performance in utility infrastructure management. Empower your team with the ultimate solution for utility infrastructure management. Maximize productivity, minimize costs, and make informed decisions with our integrated package. Elevate your operations today with our comprehensive solution tailored to meet your needs.

VALVE MAINTENANCE

KEEP YOUR VALVES MOVING – KEEP YOUR SYSTEM READY

Intermountain Sales provides complete valve maintenance solutions powered by E.H. Wachs equipment—from handheld exercisers to full trailer systems. Designed for everyday field use, these tools make it easy to locate, operate, and exercise valves of all sizes.

With features like controlled torque, accurate turn counting, and seamless data integration, crews can verify valve condition, prevent costly failures, and respond faster in emergencies. Reliable, rugged, and built for the toughest utility work, Wachs valve maintenance tools help extend asset life and keep your distribution system operating with confidence.

INFRAMAP® SOFTWARE

SMARTER FIELD MAPPING & ASSET MANAGEMENT – CONNECTED ANYWHERE

infraMAP® Software delivers real-time, GIS-based field mapping and asset management, designed for easy use on rugged tablets. Crews can locate, inspect, and update utility assets directly in the field with reliable connectivity—even in remote areas when paired with Starlink—streamlining workflows and reducing errors.

iWater complements this by providing powerful data management and reporting tools for valve, hydrant, and main maintenance. With intuitive dashboards, historical tracking, and compliance-ready reports, iWater turns field data into actionable insights, helping utilities prioritize maintenance, extend asset life, and improve service reliability.

Together, infraMAP® and iWater give your team the complete toolkit to manage, track, and optimize utility infrastructure—anywhere, anytime.

STONEX HARDWARE

RESPONSIVE, RUGGED HARDWARE BUILT FOR THE FIELD

Stonex delivers survey-grade GNSS equipment and rugged tablets purpose-built for utility work. From mapping buried assets to recording valve and hydrant data, Stonex hardware gives crews the reliable tools they need to capture precise information in any environment.

With high-accuracy positioning, long battery life, and durable designs that withstand weather, dust, and rough handling, Stonex solutions keep field teams productive day after day. Whether paired with infraMAP® software or used independently, Stonex hardware provides the trusted backbone for accurate data collection and dependable decision-making in the field.

SOFTWARE

INFRAMAP® SOFTWARE turns complex field data into simple, actionable intelligence. Purpose-built for utility mapping and asset management, infraMAP® provides crews with real-time GIS access, work order integration, and intuitive map-based tools to streamline valve exercising, leak detection, and infrastructure inspections. Easy to use on rugged tablets in the field, infraMAP® helps utilities capture accurate data, improve decision-making, and reduce Non-Revenue Water (NRW) – all while keeping operations efficient and compliant.

HARDWARE

Built for the toughest jobsites, the Stonex SRT10W rugged tablet delivers unmatched durability and performance where it matters most. With its IP67-rated waterproof and dustproof design, shock-resistant casing, and sunlight-readable display, it thrives in harsh outdoor environments—from muddy trenches to blazing rooftops. Powered by Windows and equipped with long battery life, fast connectivity, and precise GNSS capabilities, it's the ultimate tool for real-time data capture, blueprint access, and field reporting. Whether you're surveying, inspecting, or managing logistics, the SRT10W keeps your crew connected and productive without compromise.
