

Paper To Digital With infraMAP® 811

infraMAP® is a state of the art cloud-based mapping solution for 811 locates. Our solution has been developed to help utility companies manage their 811 locates through a single point of access.

With infraMAP® Cloud, users receive tickets in real-time and the software prioritizes tickets based on date/time and ticket type. Tickets are automatically created in the mapping interface as well as displaying the utilities GIS.

Improved Efficiency

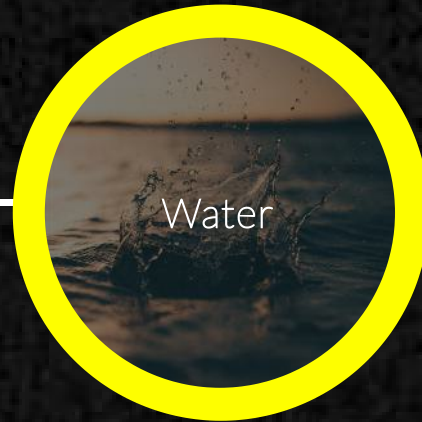

Increase your ticket completion efficiency by 30% with our solution.

Eliminate Paper

Go digital with infraMAP® for paperless 811 Ticket Management and streamline your operations.
