JAMESON®

Compact Powerhouse for Fast, Efficient FTTH Installations

The Fiber Driver with Air Boost is the ultimate handheld tool for fast, efficient Fiber To The Home (FTTH) installs. It pushes fiber hundreds of feet in seconds—far beyond what manual feeding can do.

Designed for single-user, drill-powered operation, it's ideal for flat drop cables and delivers reliable performance on every job.

Key Features:

- Compact, ergonomic handheld design
- Pushes fiber quickly—no hand feeding
- Compatible with flat and round drop cables of various sizes, up to about 6mm
- Drill-powered for easy portability
- Direct-reel payout, mid-span access & reverse drive
- Serviceable for long-term use

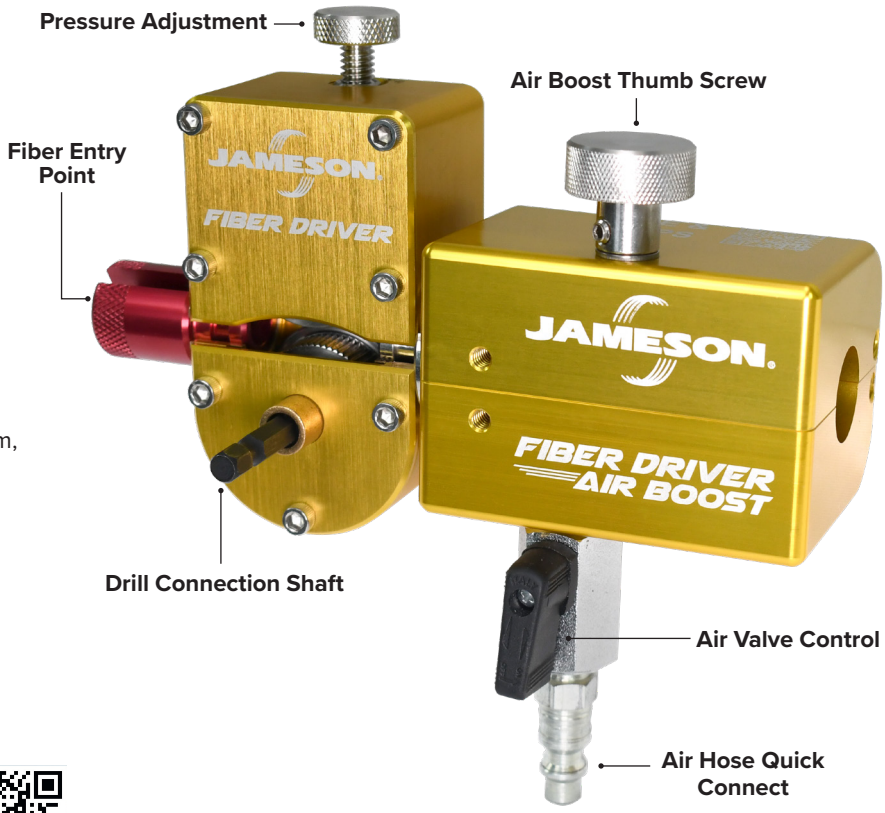
Air Boost Advantage:

Add Air Boost to reduce friction and push even farther using compressed air—no large compressor needed.

- Friction-reducing air assist for extended reach
- Works with portable compressors
- Easy to attach and rugged for jobsite use
- Perfect for FTTH and building drop installs
- Accommodates conduit/duct sizes – 10mm, 14mm, 16mm, 18mm, 19mm / 3/4"

Fast. Simple. Powerful.

Get professional results—without the heavy equipment.



Part Number	Description
18-FFK1	Fiber Driver with Air Boost
18-FFB1	Air Boost
FP200116	Flat Fiber Insert .312" x .11"
FP200118	Flat Fiber Insert .312" x .11"
FP200127	Round Fiber Insert 2mm
FP200128	Round Fiber Insert 3.5mm
FP200130	Round Fiber Insert 4.5mm
FP200131	Round Fiber Insert 5.5mm
