SINGLE USER
OPERATION

SAVES TIME
& LABOR

REDUCES FATIGUE
& CABLE BUCKLING

JAMESON®

ONE TOOL. **MORE WAYS TO WORK.**

THE INVENTION OF THE FIBER DRIVER

The Fiber Driver was built from real jobsite challenges and developed alongside installers to solve everyday problems and grow into a complete system that helps crews get more done with less effort.

01

IT STARTED IN THE FIELD

THE CHALLENGE - FIBER INSTALLATION

Crews in the field were frustrated with how slow and difficult it was to manually install final fiber installation through conduit.

OUR SOLUTION:

We developed the Fiber Driver to push fiber cable faster and with less effort.

PUSHES FIBER THROUGH CONDUIT
Allows for the loading or unloading of fiber mid-span

FASTER INSTALLS
Installs quicker and keep projects moving forward

LESS EFFORT, BETTER RESULTS
Reduces strain on crews and delivers consistent, reliable performance

02

BUILT TO ADAPT

THE NEED - FLEXIBILITY IN THE FIELD

Installers needed a solution that could work with different conduit sizes and job requirements. They asked, we delivered.

OUR SOLUTION:

Developed a wide range of adapters for more conduit sizes and jobsite versatility.

03

TAKING SPEED FURTHER

THE CHALLENGE - PUSHING FIBER FASTER

As jobs grew longer and conduit runs became more demanding, contractors needed more than manual force—they needed power and efficiency.

OUR SOLUTION:

The Air Boost acts like a capability multiplier for the Fiber Driver, forcing a steady stream of air through the conduit alongside the fiber as it's being pushed. It creates a low-friction path that allows fiber to move faster, farther, and with less effort.

REDUCE FRICTION

Air flow reduces drag inside the conduit.

INCREASE DISTANCE

Push fiber farther with greater speed.

SAVE TIME

Get more done in less time.

04

EVERY TOOL. ONE SYSTEM

THE NEED - FASTER FISH TAPE INSTALLATION & RETRIEVAL

Contractors needed a to push and retrieve fish tape faster and with less hassle. So we created an adapter that connects the Fiber Driver directly to our fish tape for quicker, more efficient operation.

OUR SOLUTION:

The Fish Tape Adapter transforms the Fiber Driver into a powered fish tape system for faster pushing, smoother retrieval, and better control in the field.

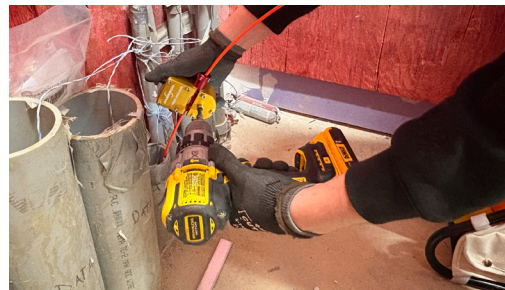

DIRECT CONNECTION

Interchangeable drive wheels grip standard fish tape for powered pushing and faster retrieval.

POWERED CONTROL

Reduce manual effort while improving speed through conduit runs.

SAVE TIME

Push farther. Retrieve faster. Get more done.

ONE **COMPLETE SYSTEM** BUILT FOR MORE JOBS

FIBER DRIVER

Fast fiber installs
eliminates hand feeding
Direct reel installations

AIR BOOST

Friction-reducing air assist
Push fiber farther

FISH TAPE ADAPTER

Push, retrieve, and rewind
fish tape with less effort

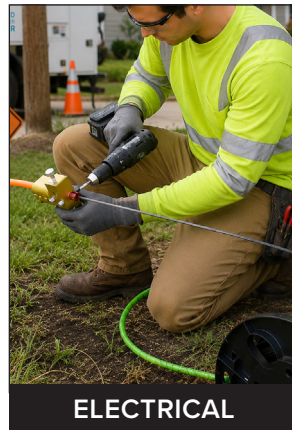

From fiber installs to fish tape retrieval, the Fiber Driver platform helps crews ditch slow manual work and get more done with one compact system.
