

The Jameson Fiber Driver streamlines final drop cable installations with an ergonomic design that reduces cable buckling and eliminates hand-over-hand feeding. Its removable, serviceable drive wheel is optimized for fiberglass reinforced drop cable and accommodates various sizes. Designed for direct reel installation, it offers a faster, more efficient alternative to pull-lines fish tapes or hand-over-hand work.

- Pushes fiber optic cable up to 300'+ in less than 30 seconds
- Enhances comfort and reduces fatigue by eliminating manual hand-over-hand fiber threading.
- Allows for the loading or unloading of fiber mid-span
- Can be driven with any power drill
- Small and lightweight, easily fit in any standard toolbox or tool bag
- Knurled and rubber drive wheels available for application-specific traction
- Hand-held, single user operation
- Capable of pulling fiber from a supported spool while pushing into the respective duct
- Functions in forward and reverse
- Indoor or outdoor applications
- Can be used to push/pull Fiber Glass rodder as well (up to 3/16" diameter)
